Cleaning Specialist
Standard Operating Procedures
Client Edition — Rev. November 11, 2026

Blue Bunny Turnover Services LLC · Orlando, Florida

About this edition. This is the Client Edition of the manual Blue Bunny's Cleaning Specialists work from, provided to clients under Section 3 of the Client Service Agreement for transparency and reference. It is written in the second person because it is the specialists' working document. It governs Blue Bunny's operations and does not impose obligations on the Client; if this document and the Client Service Agreement conflict, the Agreement controls. Compensation, performance-adjustment, and other contractor-only terms appear in the Contractor Edition and the Independent Contractor Agreement and are omitted here.

Section 1

Overview & How to Use This Document

Blue Bunny Turnover Services is a turnover-operations partner for short-term rental property management firms in Orlando, Florida. We handle cleaning, linen reset, consumables restock, add-on services, and structured reporting on every turn, end to end.

This document is the Standard Operating Procedures manual for our Cleaning Specialists. It covers the full turnover workflow from assignment preparation through departure and report submission.

How to Use This Document

The sections are ordered to follow the natural sequence of a turnover. You can read it front to back for a full understanding of the process, or jump to a specific section mid-job when you need guidance. The Table of Contents will help you find the right section quickly. Section 16 provides a one-page quick-flow reference you can use as a condensed reminder on-site.

Questions During a Turn

If you have a question while on the job, contact your supervisor by text or call. Questions during a turn are expected and will be answered in real time. Do not guess when the answer matters.

Updates to This Document

Blue Bunny may update this SOP from time to time. Clients are notified of any update that materially changes the scope of services described in the Client Service Agreement, and a client's continued scheduling of turnovers after that notice constitutes acceptance of the updated SOP. If this SOP and the Client Service Agreement conflict, the Agreement controls.

Section 2

Before the Turn

This section covers everything between accepting an assignment and arriving at the property — confirmations, understanding your assignment, and making sure you show up ready.

Confirmation Protocol

After accepting a turnover assignment, you are required to confirm twice before starting:

- First confirmation: By 9:00 PM the night before the scheduled turnover.
- Second confirmation: On the day of the turnover, no later than 1 hour before the job start time.

If you accept a turnover after 9:00 PM on the night before it, or on the day of the turnover, only the second confirmation is required. If you accept within 1 hour of the job start time, contact your supervisor immediately upon acceptance and confirm right away.

Start Times

Every job description states a job start time — the time you are to begin, which is never earlier than the guest checkout time. For same-day turnovers, the job start time reflects the urgency of the turn. For standard turnovers, it may be any time between checkout (usually 11:00 AM) and 7:00 PM on the day of checkout, and it is set early enough for the size of the home that the turn can be completed by 10:00 PM on checkout day and before the next scheduled check-in.

Assignment Details

Every assignment involves two documents.

Job Description (seen before you accept or decline). The job description gives you a summary of the turn so you can decide whether to accept:

- Bedroom and bathroom count
- Turn type: standard, deep clean, same-day, or team clean
- Job start time
- Check-in and checkout times
- Add-ons: pool cleaning, grill cleaning
- Consumables model: Blue Bunny-supplied or client-supplied
- Offsite laundry
- Errands, if any — for example, picking up Blue Bunny stock or returning laundered linens (Sections 6 and 8)
- Short-notice or re-dispatch designation, if applicable (see Section 12)

Review the job description so you know what you are committing to before you accept.

Property Information Document (received after you accept). The Property Information Document is a PDF with the property-specific details you need to execute the turn. It is issued to you for each assignment, it is built from the client's onboarding information and any property updates the client has submitted since, and it must be deleted from your devices once the assignment is complete (Section 3). It includes:

- Property address
- Bedroom and bathroom count
- Maximum guest count
- Check-in and checkout times
- Access instructions
- Add-ons (pool, grill)
- Consumables model
- Offsite laundry
- Linen storage location and backup linen count
- Listing link or staging photos
- Property-specific notes (staging preferences, thermostat settings, placement preferences, etc.)

Read the Property Information Document thoroughly before heading to the property.

What to Bring

You are responsible for providing and maintaining all tools, cleaning products, and equipment necessary to perform your services. At a minimum, arrive at every turnover with the following:

Cleaning Products

- All-purpose cleaner
- Glass and mirror cleaner
- Disinfectant spray or wipes
- Bathroom disinfectant (tile, grout, and toilet bowl cleaner)

- Bathroom descaler (for shower glass and taps)
- Degreaser (for kitchen surfaces, stovetop, and oven)
- Stainless steel cleaner (for applicable appliances)
- pH-neutral cleaner (for stone and wood surfaces — marble, limestone, quartzite, hardwood)
- Mold and mildew remover
- Laundry detergent (for washing linens where the property has no general supply of its own)
- Dish soap and dishwasher detergent (for dishes left by guests, where the property has no general supply of its own)
- Laundry stain remover (for pre-treating makeup and sunscreen stains on towels)
- Food-safe descaler, such as white vinegar or a citric-acid descaler (for coffee makers)

Cloths, Sponges & Pads

- 10–12 microfiber cloths: 4 designated for bathrooms only, 6–8 for kitchen and general use. Keep bathroom cloths strictly separate from kitchen and general cloths at all times.
- 2 scrub pads
- 1 non-scratch sponge
- 1 magic eraser
- 1 lint roller

Tools and Equipment

- Vacuum cleaner (capable of handling both carpet and hard floors)
- Spray mop with 2–3 washable pads (change or flip the pad between bathrooms and the rest of the property)
- Broom and dustpan
- Mini squeegee (for shower glass and fixtures)
- Scrub brushes (grout/crevice brush, toilet brush, general scrub brush)
- Duster or extendable duster (for ceiling fans, high shelves, vent covers)
- Spray bottles
- Rubber gloves
- 5–8 trash bags (in case property supply is depleted)
- Step stool (for reaching ceiling fans and high fixtures)
- Sharpie marker (for labeling laundry bags during offsite laundry — see Section 6)
- Indoor cleaning shoes (closed-toe, non-slip shoes designated for indoor use only)

Personal Items

- Fully charged phone (required for photos, reporting, and communication)
- Valid driver’s license and current auto insurance (must be maintained at all times)

What Not to Bring

Do not bring unauthorized persons to any property. This includes friends, family members, and children. Only you, and any substitute or helper Blue Bunny has approved in writing beforehand, should be present at the property during a turnover. Approved substitutes and helpers must be adults and are bound by the same access, security, and privacy rules as you.

Section 3

Property Access & Security

Access credentials are included in the Property Information Document for each assignment. This section covers how to handle credentials and what to do when you arrive.

Receiving Access Information

You will receive access credentials — lockbox codes, smart lock codes, gate codes, or key locations — in the Property Information Document for each assignment. These credentials are specific to each turnover. Never assume a code from a previous turn at the same property is still valid.

Arrival Protocol

When you arrive at the property:

- Park respectfully — do not block driveways, mailboxes, or neighboring properties.
- Text your supervisor with the property address, your time of arrival, and confirmation that you are on-site.
- Include a photo of the front of the property with your arrival text. This creates a timestamped record of your arrival.

Do not begin any work until you have completed the arrival notification.

Credential Security

Property access credentials are sensitive. The following rules apply to every assignment:

- Do not share access credentials with any third party.
- Do not copy, photograph, or write down access credentials anywhere that persists after the job — including your notes app, saved text messages, or paper notes.
- Do not retain any access credentials beyond the duration of the assigned turnover. Once the assignment is complete, delete the Property Information Document and any codes from your phone, messages, and notes.
- If an access code does not work when you arrive, contact your supervisor immediately. Do not attempt to find another way into the property. Your supervisor will contact the client, and you may be asked to wait up to 30 minutes while access is arranged (Section 11).
- If a phone or other device holding access information is lost or stolen, or you think a code may have been exposed, tell your supervisor immediately so the client can be notified.

Section 4

Cleaning Process — Standard Turn

This is the core of your work. Every standard turnover covers this checklist in full. The order shown is the recommended workflow, designed for efficiency — laundry starts early so it runs while you clean, and working through the property systematically means nothing gets skipped — and you may sequence the work differently, provided every item is completed to the guest-ready standard. Two points are fixed: the hazard sweep and the as-found photos come before any cleaning (Step 2), and lockup and final verification come last (Section 14).

Throughout this manual, a result, a safety or surface-care rule, a security rule, a photo, a notification, or a report item is a requirement; a sequence or working technique is the recommended method.

Cleaning Principles

Required on every turn:

- **Separate your cloths:** Bathroom cloths stay in the bathroom. Never use a bathroom cloth in the kitchen or common areas.
- **Mop pad hygiene:** Change or flip your mop pad between bathrooms and the rest of the property. Refresh your cleaning solution if it becomes visibly dirty.
- **Guest-ready standard:** If a guest walked in right now, they should have zero complaints.

Recommended technique:

- **Top to bottom:** Dust high surfaces before wiping lower ones. Clean floors last.
- **Clean to dirty:** Start with the least soiled areas and work toward the most soiled.
- **Dry to wet:** Dust and vacuum before you spray and wipe.

As you move through each room, continue watching for damage or maintenance issues. Note everything in your report (Section 9). If something requires immediate escalation, follow Section 10.

Step 1 — Exterior & Entryway Check

Before entering the property, check the front and make sure the entryway looks clean and presentable. This is the first thing the next guest will see.

- Clear any visible trash from the front door area, porch, and walkway.
- Remove any debris from the yard within immediate view of the front entrance.
- Make sure the doormat is clean and straight.
- Remove any leftover deliveries, flyers, or items that do not belong. If packages are present, relocate them to a secure spot inside the property and note it in your report.

Step 2 — Initial Walkthrough & Laundry Start

This is your first pass through the entire property. The goals are: make sure the property is safe to work in, document the as-found condition, get laundry started, and set yourself up for an efficient clean.

- Gloves on. If there are odors, ventilate the property immediately — turn on fans and crack a window.
- Turn on all lights and open blinds for visibility.
- **Hazard sweep:** Before doing anything else, scan for safety issues: leaks or standing water on floors, gas or chemical odors, broken glass, unsecured pets, chirping smoke or CO detectors. If anything is unsafe, exit the property and contact your supervisor. See Section 15 for specific troubleshooting scenarios.
- If you encounter a guest or occupant still at the property, stop immediately. Do not proceed. See Section 11.
- Take as-found photos of every room (see Section 9 for photo standards). Do this before touching anything.
- Scan every room for guest belongings left behind. Set aside any items found in a secure location inside the property, photograph them, and note a description and their location in your report; your supervisor notifies the client. Valuable or sensitive items are escalated immediately (Section 10).
- Note any pre-existing damage or maintenance issues. If damage may affect your ability to complete the turn, contact your supervisor before proceeding (see Section 10).
- Count used beds and towels to plan your laundry loads.

- Strip all beds. Collect all used towels, washcloths, bath mats, and dish towels. Bag sheets separately from towels.
- Start the first laundry load immediately (towels first — pre-treat any makeup or sunscreen stains before washing). The washer runs while you clean.
- Load the dishwasher if dirty dishes are present and start it. If dishes need hand-washing, start a hot sink soak. Use the property's dish soap and dishwasher detergent if there is a general supply on-site; otherwise use your own. Never use the dish soap or dishwasher pods set out for guests.
- Collect all trash from every room and take it to the outdoor bin.

Step 3 — Kitchen

- Wipe and disinfect all countertops and backsplash. Use degreaser where needed.
- Clean all appliances inside and out: microwave (including the ceiling inside), oven (polish the glass door; spot-clean the interior if soiled), stovetop and knobs, refrigerator (handles, door seal, and interior for spills), freezer, toaster, coffee maker, and dishwasher face.
- Descale the coffee maker with the food-safe descaler if buildup is visible, then run a clear-water cycle.
- Scrub and disinfect the sink and faucet. Run the garbage disposal briefly with cold water if the property has one.
- Finish the dishes: unload the dishwasher once its cycle ends, wash and dry anything left in the sink, and put everything away. Leave the dishwasher empty and closed.
- Wipe the range hood underside.
- Dispose of any leftover perishable food. Check expiration dates on property-stocked items and discard anything expired. Leave sealed condiments per property notes.
- Wipe down cabinet and drawer fronts and pulls. Check interiors for guest items left behind.
- Clean small appliances (coffee maker, toaster) and reset them to their default position.
- Empty the trash can, sanitize it, and place a new liner.
- Wipe chairs, stools, and coasters.
- Replace dish towels with fresh ones.
- Restock consumables per the property's program (see Section 8).

Step 4 — Living, Dining & Common Areas

- Dust all surfaces top to bottom: ceiling corners, shelves, frames, entertainment center, lamp bases, window sills, and baseboards.
- Clean the TV screen using an appropriate cloth. Do not use harsh chemicals on screens.
- Sanitize all high-touch surfaces: remote controls, light switches, door handles, and game controllers. Group remotes together in one visible spot.
- Wipe down all hard furniture: coffee tables, side tables, dining table (including the underside and legs), and chairs (seats and legs). Surfaces should be streak-free.
- Sanitize coasters.
- Vacuum upholstered furniture: remove cushions, vacuum crumbs, and lint-roll fabric.
- Replace cushions with seams straight and even gaps. Fluff throw pillows — if listing photos show a light chop or V shape at the top, match that. Otherwise leave pillows smooth. Arrange throws per the property's staged position or listing photos.
- Clean glass doors and windows on the interior side.

- Check all light fixtures and ceiling fans. Note any burned-out bulbs in your report.
- Dust ceiling fan blades if accessible. Tidy any visible cables.

Step 5 — Bedrooms

Complete the following for each bedroom:

- **Make the bed:** Smooth the mattress pad. Pull the fitted sheet tight on all four corners. Place the flat sheet evenly and make hospital corners. Shake and fluff the duvet or comforter and smooth it flat. Stand pillows upright with tags facing the back. If the property has an accent throw, place it neatly centered at the foot of the bed. If property-specific staging notes are provided in the Property Information Document, follow those instead.
- Dust all surfaces: nightstands, dressers, headboard top, shelves, and window sills. Wipe lamp bases, switches, and harps.
- Check all drawers and closets for guest belongings left behind. Confirm under the bed is clear. Ensure hangers are present and tidy, spare blanket is folded, and luggage rack is set if applicable.
- Clean all mirrors and windows — streak-free.
- Wipe light switches and door handles.
- Set blinds to the property's presentation angle per listing photos or property notes.
- Empty the trash can and place a new liner.
- Check that all lamps and lights work. Note any issues in your report.

Step 6 — Bathrooms

Complete the following for each bathroom. Do one bathroom start to finish before moving to the next. Bathrooms are the most scrutinized area by guests — attention to detail here is critical.

- Turn the vent fan on when you start. Turn it off when you finish.
- **Pre-treat and let products dwell:** Apply bowl cleaner to the toilet. Apply bathroom descaler to shower glass and taps if spotting is visible. Apply disinfectant to shower/tub walls and vanity. Let products work while you handle other tasks in the room.
- **Stone care:** Do not use acids, bleach, or descaler on natural stone surfaces (marble, limestone, quartzite). Use a pH-neutral cleaner on stone. Bathroom descaler is for glass and metal fixtures only.
- Scrub and rinse the tub or shower: walls, floor, door or curtain, fixtures, grout, and shelves.
- Check all drains for hair and blockages. Lift hair from drain traps and wipe the tub apron and under-lip. Remove any buildup.
- Squeegee shower glass and polish all fixtures.
- Clean and disinfect the sink, faucet, and countertop. Wipe vanity top, edges, and pulls.
- Polish all mirrors edge to edge — streak-free.
- Wipe light switches, door handles, and door edges.
- Scrub and disinfect the toilet: brush the bowl, wipe the seat, hinges, exterior, and base. Close the lid.
- Restock consumables per the property's program (see Section 8).
- Hang one fresh towel set per guest for the property's maximum guest count (Section 6). Place a fresh bath mat at each tub or shower.
- Empty the trash can and place a new liner.
- Check for mold or mildew. Note in your report if present.

- Clean the exhaust fan or vent if accessible.
- Turn the vent fan off before leaving the bathroom.

Step 7 — Floors (Whole Property)

All floors are done at once after finishing the room-by-room cleaning. This saves time and keeps you from backtracking.

- **Cross-contamination control:** Change or flip your mop pad between bathrooms and the rest of the property. Refresh your cleaning solution if it is visibly dirty.
- Vacuum all rooms methodically — edges, baseboards, under beds and sofas if reachable. Include entryway, hallways, and stairs.
- Mop all hard floors, working toward the exit. Pay close attention to bathroom floors around the toilet base, corners, and behind doors.
- Remove scuff marks with a non-scratch pad or magic eraser.

Step 8 — Laundry Area

Laundry loads should be rotating throughout your clean. These are the final laundry area tasks:

- Ensure all loads are complete. Fold and stage all clean linens per the property's standard.
- Clean the dryer lint trap.
- Wipe down the washer and dryer — exterior surfaces and door seals. Check the washer gasket for debris.
- Check the washer drum for any stray items.
- Leave the washer door cracked open to prevent mildew.
- If the property keeps its own laundry detergent or supplies, check them and note in your report if they are low.

Step 9 — Entryway, Hallways & Stairs

- Wipe down the front door (interior side), door handle, and any entry furniture.
- Clean hallway surfaces, light switches, and handrails.
- Shake out or replace the doormat.

Step 10 — Outdoor Spaces

The following applies to the standard turn scope. Pool and grill cleaning are separate add-on services covered in Section 7.

- Sweep the patio, deck, and walkways.
- Wipe down outdoor furniture — tables and chairs. Dump any standing water from furniture or planters.
- Empty outdoor trash cans if present.
- Remove cobwebs from the entryway, porch, and patio areas.
- Check that any patio lights work and door seals are intact. Note issues in your report.

Step 11 — Final Touches

- Set the thermostat to the property's specified default. If no default is noted in the Property Information Document, set to 74°F. Fan should be set to Auto.
- **Scent:** The property should smell clean and neutral. Do not use strong fragrances or air freshener sprays.

- Turn off all unnecessary lights. Leave any designated welcome or arrival lights on if specified in property notes.
- Close and lock all windows.
- Do a final visual scan of each room for anything missed.

Once you have completed the final touches, proceed to Section 14 for lockup, departure, and final verification.

Section 5

Cleaning Process — Deep Clean

A deep clean includes everything in the standard turn checklist (Section 4) plus the additional tasks listed below.

Scheduled deep cleans occur on every tenth turnover at a property, counted from the last deep clean performed or skipped. The client is notified with the preceding turnover report and may skip a scheduled deep clean by telling Blue Bunny before the guest checkout time for that turnover. A scheduled deep clean that falls on a same-day turnover is deferred to the next turnover at that property that is not a same-day turnover. Blue Bunny may also recommend a deep clean based on property condition — stains, buildup, odors, or guest complaints — and a condition-triggered deep clean is performed only after the client approves it.

Your job description will indicate if your assignment is a deep clean. It is not a judgment call you make on-site.

Kitchen — Additional Tasks

- Pull appliances away from the wall and clean behind and underneath them.
- Deep clean the oven interior — full degrease.
- Clean inside all cabinets and drawers.
- Descale the coffee maker with the food-safe descaler (full cycle), then run a clear-water cycle.
- Scrub grout lines on floors and backsplash.

Bathrooms — Additional Tasks

- Scrub all grout and tile thoroughly.
- Treat any mold or mildew with the appropriate product.
- Deep clean the exhaust fan.
- Clean behind the toilet.
- Descale showerheads and faucets (soak if needed).
- Scrub inside cabinets and vanity.

Bedrooms — Additional Tasks

- Vacuum mattresses.
- Wipe down bed frames and headboards — front and back.
- Clean inside all drawers and closet shelves.
- Dust and wipe baseboards thoroughly.

- Clean window tracks.
- Rotate mattresses if the property notes ask for it.

Living & Common Areas — Additional Tasks

- Move furniture and vacuum or mop underneath.
- Clean window tracks and blinds.
- Dust and wipe all baseboards.
- Clean vents, air returns, and vent covers.
- Full wash of ceiling fan blades in all rooms.
- Note any carpet stains in your report.

Laundry Area — Additional Tasks

- Run a washer cleaning cycle.
- Clean behind and around machines if accessible.
- Wash any curtains or shower liners if the property notes ask for it.

Throughout the Property — Additional Tasks

- Spot-clean walls — scuffs, marks, and fingerprints.
- Clean all door frames and tops of doors.
- Wipe all light switch plates and outlet covers.
- Clean interior windows in all rooms — full panes.
- Clean patio door tracks.
- Test remote batteries if possible — note in report if any remotes seem unresponsive.

All other procedures remain the same as a standard turn: same reporting, same photo documentation, same lockup and departure process.

Section 6

Linen Reset & Laundry

In-unit laundry is the default at every property that has a washer and dryer. Linens are washed, dried, and staged at the property before you leave.

In-Unit Laundry — Default Process

- Strip all beds and collect all used towels, washcloths, bath mats, and dish towels during your initial walkthrough (Step 2 of Section 4).
- Bag sheets separately from towels.
- **Pre-treat stains:** Check towels for makeup and sunscreen stains before loading. Pre-treat any stains before washing.
- Start the first laundry load immediately — towels first. The washer should be running while you clean.
- Rotate loads throughout the turn as needed. Clean the lint trap after every dryer cycle. Check the washer gasket for debris between loads.
- Wash linens on hot. Use the property's laundry detergent if there is a general supply on-site; otherwise use your own. Never use the laundry pods set out for guests.

- Dry all linens fully. Do not stage any damp linens on beds or in bathrooms.
- Fold and stage all clean linens once dry.

Bed Linen Staging

- Fresh fitted sheet, flat sheet, and pillowcases on every bed.
- Smooth the mattress pad before placing the fitted sheet. Pull the fitted sheet tight on all four corners.
- Hospital corners on the flat sheet.
- Shake and fluff the duvet or comforter. Smooth it flat.
- Stand pillows upright with tags facing the back. Arrange decoratively.
- If the property has an accent throw, place it neatly centered at the foot of the bed.
- If property-specific staging notes are provided in the Property Information Document, follow those instead of the defaults above.

Bathroom Linen Staging

- **One towel set per guest, for the maximum guest count in the Property Information Document:** one bath towel, one hand towel, and one washcloth — hung or folded per the property's standard.
- Fresh bath mat placed at each tub or shower.
- If property notes specify a particular fold or arrangement (fan fold, rolled towels, etc.), follow those.

Laundry Area Closeout

- All loads must be completed before you leave. No wet laundry left in the washer.
- Clean the lint trap after every dryer cycle.
- Leave the washer door cracked open to prevent mildew.
- Wipe down the washer and dryer.
- Fold and store any extra or spare linens in the property's designated storage location.

Offsite Laundry

Offsite laundry is activated in three situations:

- The property has no washer or dryer. Offsite laundry then applies at every turnover.
- The washer or dryer at the property is out of service.
- The turnover is a same-day turn with more than three bedrooms.

The Property Information Document will indicate if offsite laundry is needed. Blue Bunny provides laundry bags on-site at properties that require offsite laundry. When activated:

- Complete the turn using the property's backup linens so every bed and bathroom is staged before you leave (see Section 15 if there are not enough).
- Bag used linens by room. Label each bag with the property address and the exact room the linens belong to (e.g., "123 Main St — Master Bedroom"). Use the Sharpie from your supply kit.
- Deliver the bags to a wash-and-fold (drop-off) laundry facility within approximately ten miles of the property, or to the nearest suitable facility if none is that close. Tell your supervisor which facility you used and when the linens will be ready.

- Keep every receipt. Facility charges are billed to the client at cost, so every charge — whether paid at drop-off or at pick-up — needs a receipt. Send receipts to your supervisor within 24 hours of the laundry run; they do not go in with your turnover report, which is due before the run is finished.
- If the facility is more than ten miles from the property, log the mileage and send it with the receipts.
- Note the number of bags used in your inventory report so Blue Bunny can track and replenish the on-site supply.
- Bringing the laundered linens back to the property is a separate trip, made by you or by another specialist as your supervisor arranges. Linens go back as soon as practicable and no later than the next turnover at that property, and are put away in the property's designated linen storage. The arrival and departure notifications and the lockup procedure apply to that visit just as they do to a turnover (Sections 3 and 14).

What Not to Do

- Never leave a load sitting wet in the washer when you depart.
- Never stage damp linens on beds or in bathrooms.
- Never mix linens from different properties if doing multiple turns in a day with offsite laundry.

Section 7

Add-On Services — Pool & Grill Cleaning

Pool and grill cleaning are per-turn add-ons that the client chooses for each property, at onboarding or later by property update. If your assignment includes them, it will be indicated in the job description and the Property Information Document. These are completed in addition to the standard or deep clean checklist.

Pool Cleaning

Scope: pool deck and pool surface. This is turnover-level cleaning, not chemical treatment or equipment maintenance.

- Sweep the entire deck area.
- Wipe down all pool furniture — chairs, tables, and loungers. Dump any standing water.
- Remove any trash or debris from the deck.
- Straighten and arrange furniture to the property's default layout.
- Skim the pool surface for leaves, bugs, and debris using the skimmer net the client keeps at the property. If it is missing or broken, complete the rest of this list and note it in your report.
- Check the pool area for guest items left behind.
- Check that the pool gate latch functions properly.

Report if observed: visible damage to deck, furniture, or enclosure; discolored water or strong odor; broken or missing equipment.

Not in scope: Chemical testing or balancing, filter cleaning, pump operation, draining.

Grill Cleaning

Scope: exterior and cooking surfaces, cleaned to guest-ready condition. The client keeps a grill brush at the property; if it is missing or unusable, clean what you can without it and note it in your report.

- Confirm the gas supply is turned off before cleaning.
- Scrub grates with the on-site grill brush. Remove all food residue and grease.
- Wipe down exterior surfaces, handles, and side shelves or tables.
- Wipe tongs and brush handles.
- Empty the grease trap or drip pan if accessible.
- Replace the grill cover.
- Remove any trash or debris from the grill area.
- Check propane level if it is a gas grill. Note in your report if the tank feels low or empty. Do not swap or refill propane tanks.
- If the grill brush is shedding bristles, photograph it and note it in your report.

Report if observed: damage or broken parts; missing tools; anything making the grill unusable for the next guest.

Not in scope: Propane replacement, deep degreasing of internal components, grill repair.

Section 8

Consumables Restock

Every property uses one of two consumables models: Blue Bunny-supplied or client-supplied (the property manager stocks their own). The Property Information Document will indicate which model applies. In both cases, consumables are stored on-site and you restock from the property's supply closet.

Blue Bunny-Supplied Properties

Blue Bunny stocks the property in cycles of roughly six months and tops up as needed; each delivery is recorded on a stocking statement issued to the client. You restock from on-site inventory each turn. Under normal circumstances, you do not need to bring consumables to these properties. Restock the following each turn:

Per full bathroom:

- 1 hand soap
- 1 body soap
- 1 shampoo
- 1 conditioner
- 2 toilet paper rolls

Per half bathroom: 1 hand soap and 2 toilet paper rolls only.

Kitchen and general:

- 1 paper towel roll
- 1 dish soap
- 1 sealed sponge
- 4 dishwasher pods (if the property has a dishwasher)

- 4 laundry pods (if the property has a washer and dryer)
- 2 trash can liners per trash can — kitchen and bathroom cans

Place all items in their designated locations. If property notes specify placement preferences, follow those.

Low inventory: If a property is running low, this will be indicated in the job description before you accept. You will need to pick up additional Blue Bunny stock and bring it to the property as part of that turn. Record the items and quantities you delivered in your report so Blue Bunny can issue the stocking statement for the top-up.

Client-Supplied Properties

The client stocks their own consumables. Restock from what is on-site according to property-specific notes in the Property Information Document. Items and quantities vary by property. If anything is low, empty, or expired, flag it in your report so the client can resupply before the next guest.

Inventory Reporting

Every turn report includes a consumables and inventory section. Report what you placed, what is remaining in storage, and what is low or missing. At Blue Bunny-supplied properties, count the remaining stock exactly, item by item — the most recent count is the figure used if the client ever leaves the program, so an estimate is not acceptable. This is part of the report covered in Section 9.

What Not to Do

- Do not use consumables meant for guests as your own cleaning supplies. That includes the guest laundry pods, dish soap, and dishwasher pods: do not use them for the turnover wash or for dishes left by the last guest.
- Do not substitute items from one property's stock for another.
- If on-site inventory is low or empty and it was not indicated in the job description, report it. Do not leave the property understocked without flagging the issue.

Section 9

Photo, Damage & Inventory Report

A structured report is delivered to the client after every turn. It is not optional. Your responsibility is to capture the information accurately and submit it on time.

Submission Deadline

- **Target:** Submit your report within 30 minutes of completion (lockup and departure).
- **Required:** No later than 1 hour after completion.
- Blue Bunny delivers the finished report to the client within 2 hours of completion.

If you are doing multiple turns in a day, submit each report as you finish each property. Do not wait until the end of the day.

What to Photograph — Before Cleaning

Taken during your initial walkthrough, before any cleaning begins:

- Overall condition of each room as found.
- Any pre-existing damage.

- Any guest belongings left behind.
- Anything unusual or noteworthy.

What to Photograph — After Cleaning

After each room is complete, photograph it in its guest-ready state. One wide shot per room plus 1–2 detail shots (bath fixtures, made bed, kitchen surfaces, etc.):

- **Kitchen:** clean countertops, appliances staged, clean sink.
- **Bathrooms:** toilet, tub or shower, vanity and mirror, towels staged, consumables placed.
- **Bedrooms:** made beds, clean surfaces.
- **Living and common areas:** staged, clean, organized.
- **Outdoor areas:** if pool or grill add-ons were completed, photograph the finished result.
- Include a photo of the thermostat setting and lock status.

What to Report — Damage & Maintenance

- Any damage discovered: stains, broken items, wall damage, appliance issues, plumbing problems, broken fixtures.
- Whether the damage was pre-existing or occurred during cleaning.
- If you caused damage, notify your supervisor immediately — do not wait for the report. See Section 10.
- Burned-out bulbs, non-functioning appliances, running toilets, leaks — anything the client should know.

What to Report — Inventory & Consumables

- What you restocked and what is remaining in storage — an exact item-by-item count at Blue Bunny-supplied properties (Section 8).
- Anything low, missing, empty, or expired.
- **Linen condition:** note any stained, torn, or worn-out linens that should be replaced.
- Number of offsite laundry bags used, if applicable. Laundry receipts are sent separately (see Section 6).

What to Report — Action Items

- Anything the client's team needs to act on before the next guest: restocking, repairs or maintenance, replacements, or follow-ups on guest belongings.

What to Report — Lockup Confirmation

- All doors locked and windows closed.
- Property secured.
- Access credentials deleted — nothing retained.
- Timestamp of your departure.

Photo Standards

- **Well-lit:** All lights on before taking photos.
- **In focus:** No blurry images.
- **Full coverage:** Wide enough to show the full area, not just a close-up.
- **Clean frame:** No personal items, phone reflections, or mirror selfies visible.

- **Timestamp:** Every photo must carry the date and time it was taken. Keep your phone's date, time, and camera settings so that this information is saved with each photo, and turn on the visible timestamp if your phone offers one.
- Take more than you think you need. It is easier to have extras than to be asked to go back.

Photo and Property Data Privacy

All photographs, videos, and property data collected during a turnover are to be used solely for the purposes this SOP requires — your arrival and departure notifications, communications with your supervisor, and the report:

- Do not share, post, publish, or distribute any property photographs, videos, or data on social media, personal accounts, messaging platforms, or any other channel, other than by sending them to Blue Bunny through the channels it designates or, on a team clean, to the specialist submitting that turn's report.
- Delete all property photographs and data from your personal devices within 24 hours of submitting the completed report.

Blue Bunny does not publish or distribute property photographs, reports, or data outside the client relationship without the client's separate written consent (a Property Media Release).

Section 10

Damage Discovery & Reporting

This section covers what to do when damage is discovered or caused during a turn. These procedures involve real-time escalation and are separate from the routine report in Section 9 — though damage is also documented in your end-of-turn report.

Damage You Discover — Pre-Existing

- Photograph the damage.
- Note the location and description.
- Include it in your end-of-turn report (Section 9).

No immediate escalation is needed unless the damage affects your ability to complete the turn. In those cases, contact your supervisor before proceeding.

Damage You Cause

- Stop what you are doing.
- Photograph the damage immediately, before touching or moving anything further.
- Contact your supervisor immediately. Do not wait until the end of the turn.
- Document the damage in your end-of-turn report, clearly noting that it occurred during cleaning.
- Do not attempt to hide, repair, or minimize the damage.
- Do not leave the property without having reported the damage to your supervisor.

Blue Bunny notifies the client promptly of any damage caused during a turnover and documents it with photographs. Transparency is always the right course of action. Honest, immediate reporting is expected.

When to Escalate Immediately — Regardless of Cause

Contact your supervisor immediately if you encounter:

- Anything making the property unsafe or unrentable: active water leaks, broken glass, sewage issues, broken locks or doors, pest infestation, or structural damage.
- Valuable or sensitive guest belongings left behind.
- Any situation where you are unsure whether to proceed.

Section 11

Guest & Occupant Encounters and Access Delays

If you arrive at a property and someone is still present: do not engage, notify your supervisor, and wait for instructions.

If Someone Is at the Property When You Arrive

- Do not enter.
- Contact your supervisor immediately from outside.
- Provide: property address, what you observed, whether you have had any interaction.
- Wait for instructions.

If You Encounter Someone After Entering

- Stop cleaning immediately.
- Keep any interaction brief and polite: “Hi, I am with the cleaning service — let me check with my team.”
- Step outside or move to a neutral area.
- Contact your supervisor immediately.
- Wait for instructions before resuming.

Waiting Period and Access Delays

When you arrive at or after the guest checkout time and a guest or occupant is still present, an access code does not work, or the property is otherwise not safe or ready, your supervisor contacts the client immediately. You may be asked to wait up to 30 minutes while the client resolves the issue.

- If the turn can begin within that time, proceed as normal. The completion target extends by the length of the delay.
- If the turn cannot begin within that time, your supervisor will release you or re-dispatch the turn. Do not leave until your supervisor confirms.
- If the client cancels the turn after you have arrived, your supervisor will release you; do not begin or continue work.

What Not to Do

- Do not ask the guest or occupant to leave.
- Do not discuss the booking, checkout time, or any property details.
- Do not continue cleaning around the person.
- Do not share your name, the client’s name, or any access information.

If You Feel Unsafe

Leave the property immediately. Contact your supervisor once you are in a safe location. You are never required to remain where your safety is at risk.

Section 12

Same-Day Turnovers, Team Cleans & Short-Notice Assignments

The cleaning and reporting standards do not change for these turn types — what changes is the timeline and, for team cleans, how you coordinate with another specialist.

Same-Day Turnovers

A same-day turnover is a turn where a new guest is checking in on the same calendar day the previous guest checked out. A property cleaned on checkout day without a same-day arrival is a standard turn. Your job description will indicate if your assignment is a same-day turnover.

- **Target:** guest-ready within 3.5 hours of the scheduled checkout time. The window extends if access is delayed (Section 11) or additional time is approved for extraordinary conditions (Section 15).
- Same checklist applies in full. Nothing is skipped.
- Same reporting deadline applies (Section 9).
- Prioritize efficiency without cutting corners.

Team Cleans

Triggered when a same-day turnover involves a property with more than three bedrooms. Two specialists are dispatched, and offsite laundry applies (Section 6). Your job description will indicate if your assignment is a team clean.

- Coordinate with your partner on arrival. Divide the property logically — for example, one takes bedrooms and bathrooms, the other takes kitchen, living, and common areas.
- If your supervisor provides instructions on how to divide the work, follow those.
- Both specialists are responsible for the quality of the full turn.
- One report per turn. Coordinate on who submits, or follow your supervisor’s direction. The other specialist sends their photos to the one submitting, for that report only.

Short-Notice Assignments

A short-notice assignment is a turnover that was not visible to Blue Bunny through the client’s property management system (PMS) or calendar integration, and was not requested by the client, before the calendar day on which it must be completed. The job description will indicate if the assignment is short-notice.

- One confirmation only: on the day, no later than 1 hour before the job start time. If accepted within 1 hour of the job start time, contact your supervisor immediately.
- Same cleaning and reporting standards apply.

Re-dispatched assignments. A turn that is sent out again after an access failure, or a return visit to finish a turn that was stopped, is a new assignment. The usual confirmation rules apply (only the second confirmation if you accept it after 9:00 PM the night before, or on the day), along with the same cleaning and reporting standards. The job description will say that the assignment is a re-dispatch.

Section 13

Reclean Protocol

A reclean is triggered when the client submits photo documentation showing that the property did not meet guest-ready standards — before the next guest's check-in and no later than 24 hours after the turnover report was delivered — and Blue Bunny confirms from that documentation that the standard was not met. Recleans are dispatched as promptly as possible, with the goal of completing them before the next guest's check-in; if that is not possible, the client receives a credit under the Client Service Agreement instead.

If You Performed the Original Turn

You will be contacted first and offered the chance to return and correct the work.

- **Response window:** 1 hour from the time you are notified.
- If you decline or miss the window, the reclean is assigned to another specialist.
- Where the next check-in is too close to allow the full response window, Blue Bunny may assign the reclean to the first available specialist.

On-Site

- You will be told what specific areas need to be addressed.
- Focus on those areas. Also do a quick scan of the rest of the property.
- Same reporting and lockup protocols apply (Sections 9, 3, and 14).

Someone Else's Reclean

You may be assigned to reclean a property you did not originally clean. Same process: address the flagged issues, scan the property, submit your report.

What Does Not Qualify

A deficiency that was noted in the report is not a reclean item if it exists because the client did not approve additional time for extraordinary conditions (Section 15), or because of something on the client's side — for example, too few linens or consumables at the property, or a washer or dryer that was out of service.

Section 14

Lockup, Departure & Final Verification

This is the last thing you do before leaving. Take your time — it is your final chance to catch anything before the next guest walks in.

Property Lockup

- Close and lock all windows.
- Close and lock all exterior doors — front, back, garage, patio, and sliding doors.
- Secure any gates, pool enclosures, or fenced areas.
- Set the thermostat to the property's default. If not noted, set to 74°F, fan Auto.
- Turn off all lights except designated welcome or arrival lights.
- Set any alarms or security systems if specified in property notes.

Final Walkthrough

Walk the guest path: entry → living room → kitchen → bedrooms → bathrooms → patio. Fix any fingerprints, stray hairs, or streaks you find.

Exterior and Entryway

- Front of property is clear of trash and debris.
- Doormat is clean and straight.
- Porch and entry area are presentable.

Kitchen

- All appliances are clean and closed.
- Counters are clear and wiped.
- Trash can is empty with a fresh liner.
- Dishwasher is emptied and closed.
- Fresh dish towels are in place.

Living, Dining & Common Areas

- Surfaces are dusted.
- Cushions and decor are staged to listing photos.
- Remotes are grouped together.
- Floors are clean.

Bedrooms

- Beds made: fitted sheet tight, hospital corners, duvet smooth, pillows upright, tags back.
- Drawers and closets checked for guest items.
- Trash cans emptied.

Bathrooms

- Towels hung, toilet paper stocked, consumables placed.
- Mirrors streak-free.
- No hair on surfaces or in drains.
- Toilet lid closed.
- Floors mopped.
- Vent fan off.

Laundry Area

- All loads finished — nothing in washer or dryer.
- Linens folded and staged.
- Lint trap clean. Washer door cracked.

Outdoor Spaces (if add-ons assigned)

- Pool deck swept, furniture arranged.
- Grill cleaned, cover replaced.

Throughout

- All damage and maintenance issues noted.
- No guest belongings missed.

Before You Leave — Final Checklist

Confirm the following as you leave:

- As-found photos taken during initial walkthrough.
- After-cleaning photos taken for every room.
- All damage and maintenance issues documented.
- Consumables restocked and inventory reported.
- All linens clean, dry, and staged.
- Property locked and secured.
- Access credentials not retained — once the property is locked, delete the Property Information Document and codes from your phone, messages, and notes.
- Report submitted or in progress. Target: 30 minutes. Required: within 1 hour.

Departure Notification

Text your supervisor when you leave: property address, time of departure, and confirmation that the property is locked and secured.

Section 15

Troubleshooting & Escalation

Not every turn goes as planned. This section covers specific situations that fall outside the normal workflow. In every case: document, communicate, and do not attempt to fix problems that are outside your scope.

No Power or Water

Stop cleaning. Document with photos. Notify your supervisor and wait for instructions. The waiting period in Section 11 applies while the client resolves the issue. If it is not resolved within that time, your supervisor will release you, and any later visit to finish the property is scheduled as a new turnover.

No Air Conditioning

Report it to your supervisor right away, photograph the thermostat, and note it in your report so the client can arrange a repair. Keep working unless the heat makes it unsafe to continue. If it does, stop, move somewhere cooler, and tell your supervisor: the property is then treated as unsafe, and the waiting period in Section 11 applies.

Washer or Dryer Failure

Use clean backup linens from the property's storage. Bag the dirty linens and label them. Report the equipment failure immediately. If backup linens are not available, follow "Not Enough Clean Linens" below. The bagged linens go to offsite laundry as your supervisor directs (Section 6).

Not Enough Clean Linens

Photograph the linen storage to document what is available. Contact your supervisor, who will notify the client. Do not leave a bed unmade unless your supervisor confirms there is no alternative; in that case, make the beds your supervisor specifies, photograph any bed left unmade, and note it in your report.

Smoking, Party, or Pet Evidence (Extraordinary Conditions)

If a property is in a condition materially beyond normal guest use — party aftermath, smoking, pet accidents, excessive trash, or similar heavy soiling:

- Photograph the evidence thoroughly before touching anything. Note any odors.
- Estimate the extra time needed and contact your supervisor before proceeding.
- Your supervisor notifies the client with the estimate, and the client has up to 30 minutes to decide; you may be asked to wait for the answer. Additional time is performed only after the client approves it, and approved time is billed under the Client Service Agreement.
- If the client does not approve additional time within that window, complete the standard turnover scope as far as reasonably possible and note every remaining deficiency in your report.

Pests

Photograph and report immediately. Do not apply any sprays or treatments unless the property's notes specifically provide for it. Contact your supervisor. An active infestation is outside the scope of service and is handled under "Biohazards" below.

Biohazards (Blood, Bodily Fluids, Needles, Sewage, Infestation)

Stop. Do not attempt to clean. Contact your supervisor immediately. Biohazard conditions are outside the scope of service: Blue Bunny notifies the client so that specialized remediation can be arranged, and may decline to perform or complete the turnover until the condition has been remediated. You are never required to clean a biohazard.

Chemical Safety

Never mix acids with bleach or other chemicals. If you are unsure whether two products are safe to use together, do not combine them. When in doubt, use one product, rinse thoroughly, and then use the other.

Section 16

Quick-Flow Reference

Use this page as a condensed reminder of the full turnover workflow. For detail on any step, refer to the section indicated.

START

- Park respectfully. Arrival text + photo of front to supervisor. (Section 3)
- Gloves on. Ventilate if needed. Hazard sweep. (Section 4, Step 2)
- As-found photos of every room. Count beds and towels. (Section 4, Step 2; Section 9)
- Strip beds, collect towels. Laundry load 1: towels (pre-treat stains). (Section 6)
- Trash out and re-lined. Dishes started. (Section 4, Step 2)

CLEAN

- Kitchen: Appliances inside and out, surfaces degreased, sink, disposal, range hood, coasters, dishes put away, restock. (Section 4, Step 3)
- Living / Dining: Dust top-down, electronics, lint-roll sofa, stage cushions and throws, table and chairs. (Section 4, Step 4)
- Bedrooms: High dust, surfaces, make bed (hospital corners, pillows upright, tags back), mirrors, closet check. (Section 4, Step 5)
- Bathrooms: Pre-treat and dwell, scrub, fixtures, mirror, toilet (lid closed), restock, vent fan off. (Section 4, Step 6)
- Floors: Vacuum all rooms, mop hard floors, remove scuffs. Change mop pad between bathrooms and general areas. (Section 4, Step 7)

RESTOCK & STAGE

- Consumables per program — Blue Bunny-supplied or client-supplied. (Section 8)
- Linens: all loads complete, folded, staged. No damp linens. (Section 6)
- Stage to listing photos. Thermostat set. Scent neutral. Lights per property notes. (Section 4, Step 11)
- Pool and grill if assigned. (Section 7)

FINISH

- Final walkthrough: walk guest path, fix fingerprints, stray hairs, streaks. (Section 14)
- After-cleaning photos of every room. (Section 9)
- All doors and windows locked. Alarm set if applicable. (Section 14)
- Departure text to supervisor. (Section 14)
- Submit report. Target: 30 minutes. Required: within 1 hour. (Section 9)
- Delete the Property Information Document and access codes from your phone, messages, and notes as soon as the assignment is complete. (Section 3)
- Delete property photos from your phone within 24 hours of submitting the report. (Section 9)
